March NEWSLETTER 2014

Security Expo 2014

June 4-6

This year STENTOFON will be on display with a bright new outlook. We are excited to catch up with everyone again in our home town Melbourne.

More info coming soon....

Don't forget FLOWIRE

Bring IP functionality to your existing two wire infrastructure.

Zenitel is pleased to announce that our Flowire Converter is available in a new and improved enclosure.

The new version functions exactly like the previous one, but has some minor changes, making the device more user-friendly.

Changes from Rev. 0101:

- New colour (silver)
- LINK button does not protrude from housing, thus preventing accidental activation
- Grounding screw easily accessible near the Flowire terminal
- Possibility to mount DIN-rail fasteners on short edge for higher unit density in racks.

New datasheet available now.

EXIGO Released to the Market

The Exigo product line was launched to the marine market in 2013. Based on native IP technology, the system is an advanced, scalable system specifically designed to meet the demands and needs of PAGA and general alarms for a variety of applications and environments. The Exigo solution offers enhanced features and functionality, yet simplistic in installation and set-up for Marine, Offshore and Industrial environments. In addition to system controller and amplifiers Zenitel have developed several new IP-based call panels for indoor, industrial and hazardous areas (Ex).
