MEET TURBINE

STENTOFON's latest innovation in Intercom
First release of 9 compact stations

EXTREME ROBUSTNESS

- ◆ Dirt, dust and water resistant (IP 66)
- ◆ Impact resistant (up to IK 10)
- ◆ Poke protected
- ◆ Vandal resistant fastening
- ◆ Microphone underneath for better protection
- ◆ 3mm steel or lexan front plates
- ◆ UV resistant
- ◆ Extreme sound pressure levels even in Open Duplex mode

There is a turbine station for every situation and with new customization available, you will want to put your name on one of these turbine stations.

CRYSTAL CLEAR AUDIO

You need to hear it to believe it. To organize an onsite demonstration of the STENTOFON turbine experience, contact STENTOFON Communications Australia

MODERN DESIGN

Inspired by the design of high end Hi-fi Systems, turbine uses only the very best technology in sound as well as communication

COMPETITIVE PRICE

With IP technology cutting down on cabling costs and the SIP / Pulse server-less options, STENTOFON is a cost effective product that can offer a solution to all your communications needs in one system.

Feedback

Are you one of our valued customers and have enjoyed our quality service and equipment? If so we would love your feedback. Let us know how your system is performing and in turn we can promote your company on our website and in our newsletters. Your company could feature in our next case study.
